May	中国智能交通年鉴 Yearbook of ITS in China Hosted by ITS China	Contributed an article about the ITS industry in Hong Kong

Moving Forward

- Very good prospects ahead.
- ITS-HK will continue to serve as a platform for the exchange between our members and as a bridge between our members and the industry with the Government.
- Initiatives arising from survey with members:
 - The need for GPS or China Beidou / Compass Navigation System infrastructure in Hong Kong
 - The need for ITS industry chain for sustainable development of ITS in Hong Kong
 - HKSAR Government facilitating the interaction with ITS development in Mainland China, or enabling ITS Hong Kong to take up the role.
 - Recognition of the ITS Hong Kong Members by the HKSAR Government
 - More researches in ITS technologies in Hong Kong

Goals

- Set up and maintain regular meetings with the Transport Department.
- Set up focus groups for emerging technologies and maintain close liaison between the industry and the Government
- ITS Hong Kong be represented in the Expert Groups to be set up by the Transport Department.
